iMovie
- The Basics in Easy-to-Read Language

Make your own movie

Petri Ilmonen & Anneli Haapaharju

iMovie app

iMovie is an app

in which you can edit video clips.

The app gives you basic tools

for making your own movie.

In iMovie you can add effects,

pictures and sounds into your video.

You can also make trailers

or record in the app.

The app is quite easy to use.

iMovie app is in English.

You can find the app from the App Store.

The app costs about 5€.

iMovie app is a perfect tool for:

- editing video clips

- making a video of pictures

- story telling

- presentation

- group and pair work

You can save your videos

on the iPads' camera roll

and share them online.

Ideas for a movie:
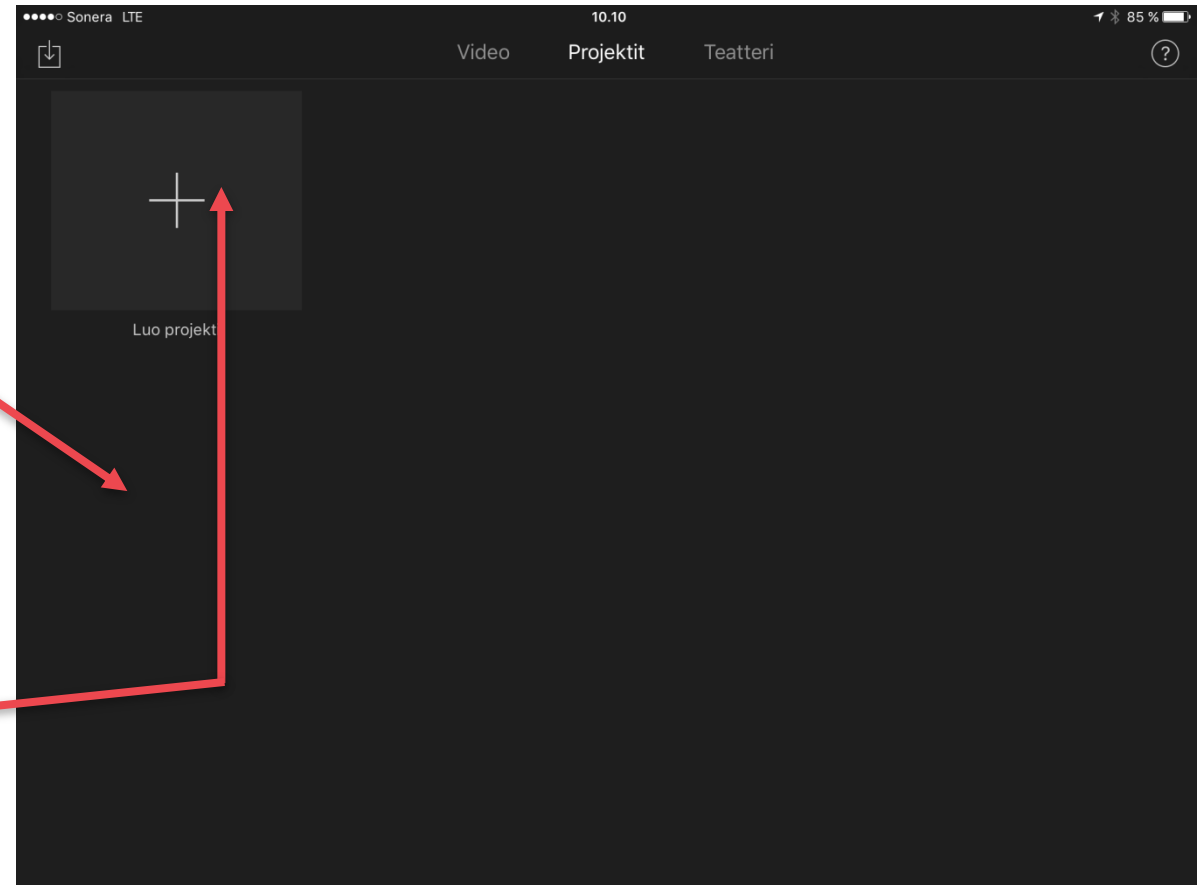

How to make your own movie?

1. Open iMovie app.

   If you already have

   iMovie projects,

   you will see your movies here.

2. Let's start making a new movie.

3. Tap on the **Add**-button.

   It looks like **+** -button.

Now you need to choose.

You have two options:

- Make a new movie on your own

- Make a short trailer

  or use iMovies templates.

In this booklet,

we are making

a new movie.

4. Tap on the **Movie**-button.

Now you will see a Media screen.

5. Tap on the **Create Movie** -link.

My Movie screen opens.

Now you have a choice of

selecting media for your own movie

or recording a new video.

We will now show you

how to add an existing video.

6. Tap on the **Video**-button.

Idea:

You can add also pictures.

If that is your wish,
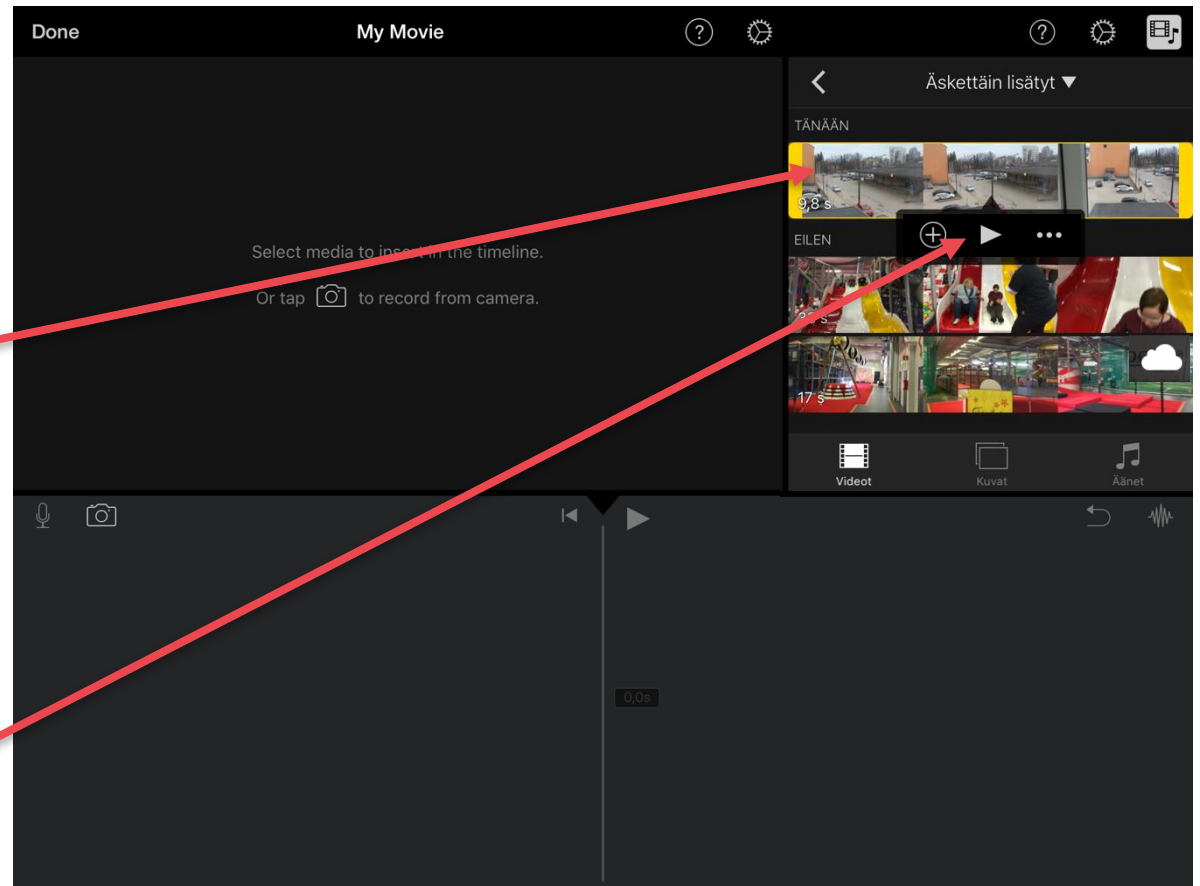

tap on Photos-button.

7. Look for the video
   you want to add in
   your movie.

8. Tap on the video
   you want to add.

9. Preview the video
   to check it is the one you want.

   Tap on the **Play**-button.

10. Tap on the **Add**-button.

Remember:

Not all videos are stored

on your iPad.

Videos can also be stored

on the iCloud service.

If the video has a Cloud-**sign**,

you need to download the video

onto your iPad first.

Downloading starts

when tap on the Cloud-button.

11. Now you will see your video
    on the timeline.

12. Now you can add more
    video clips the same way
    onto the time line.

Hint:

You can edit your movie by:

- shortening the video clips

- adding a picture

- adding a text

- adding an effect or animation.

You can also add a sound
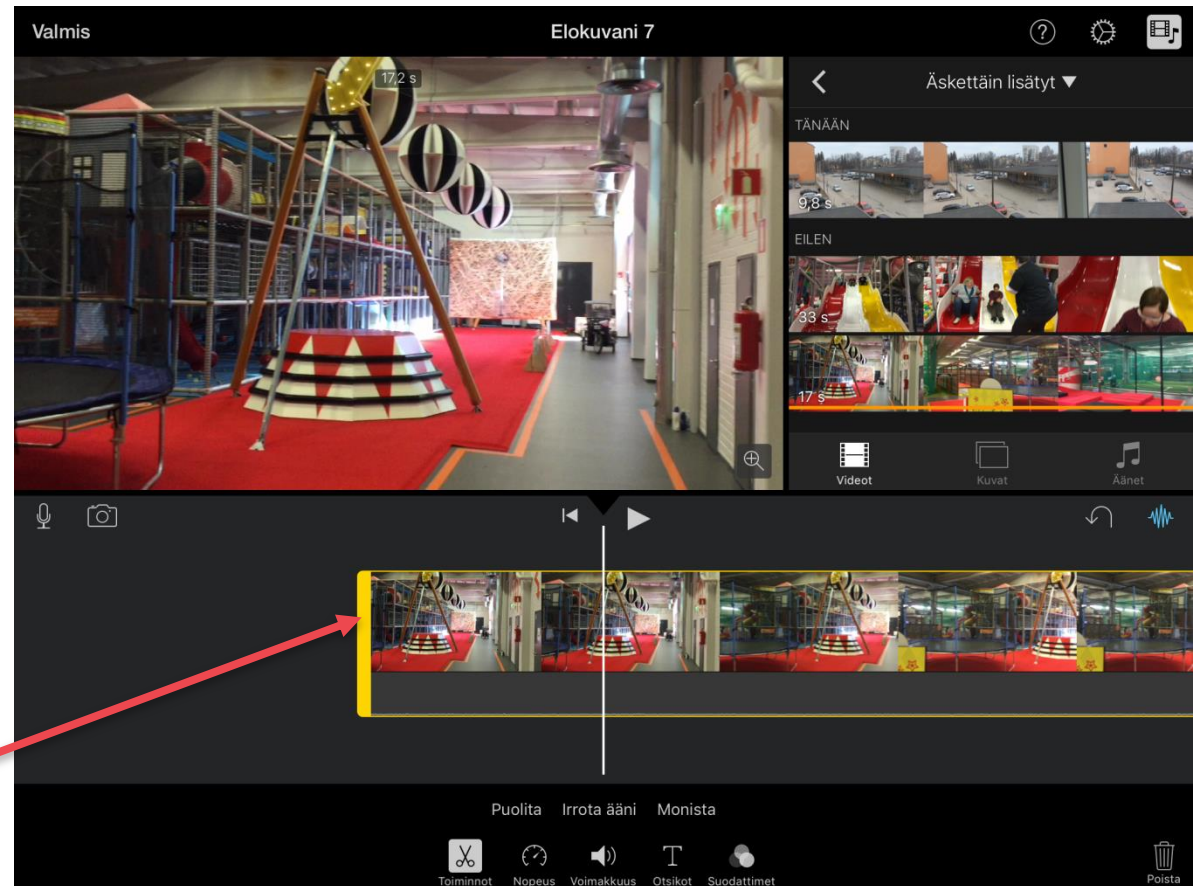

or recording a speech.

How to cut your videos

You can cut videos

from three different places:

- the beginning
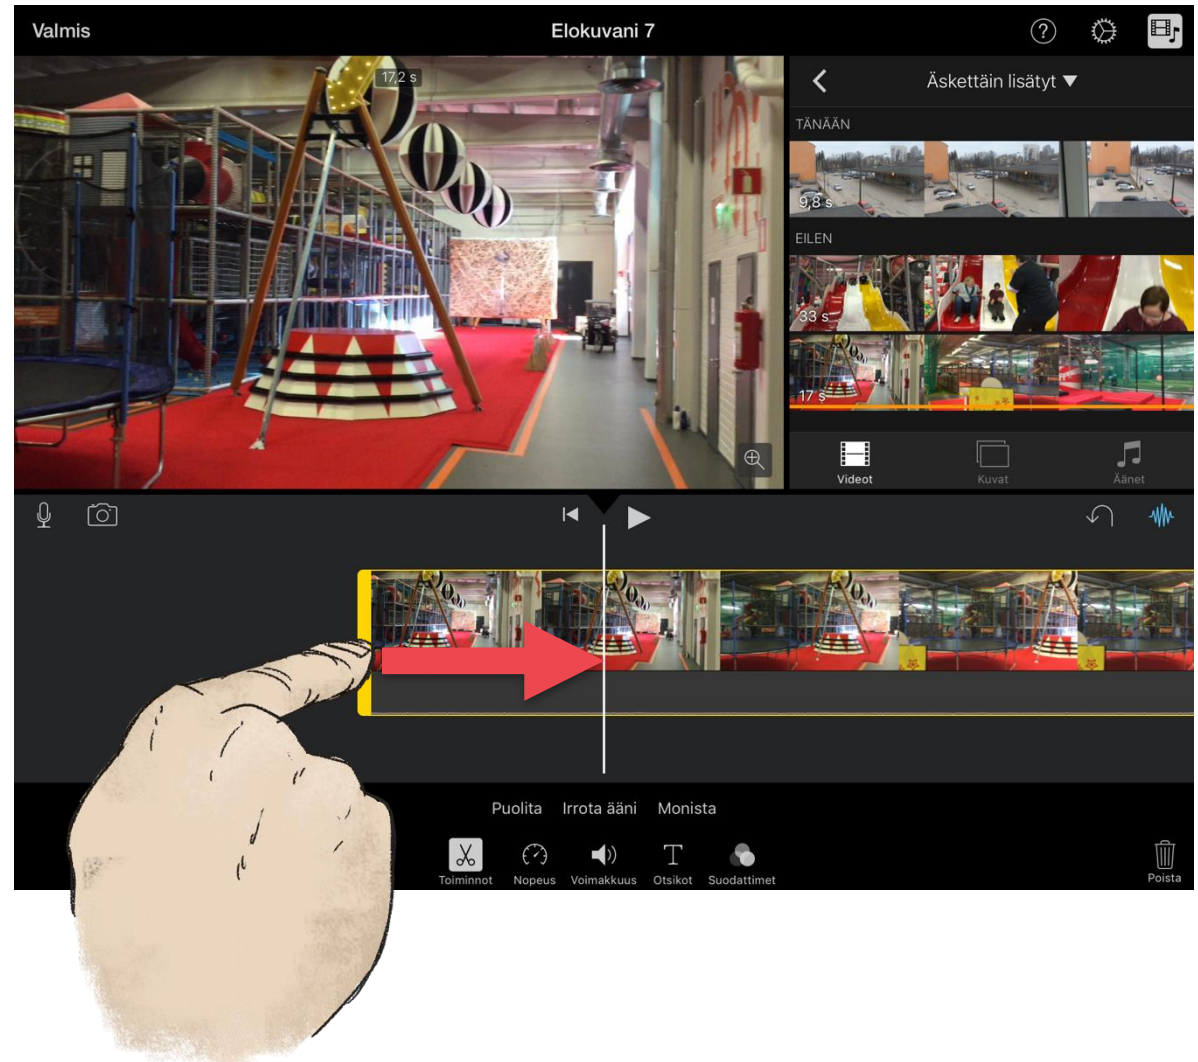

- the end

- the middle.

First you always need to

activate the video

that you want to edit.

Tap on the video on the timeline.

When a video is activated,
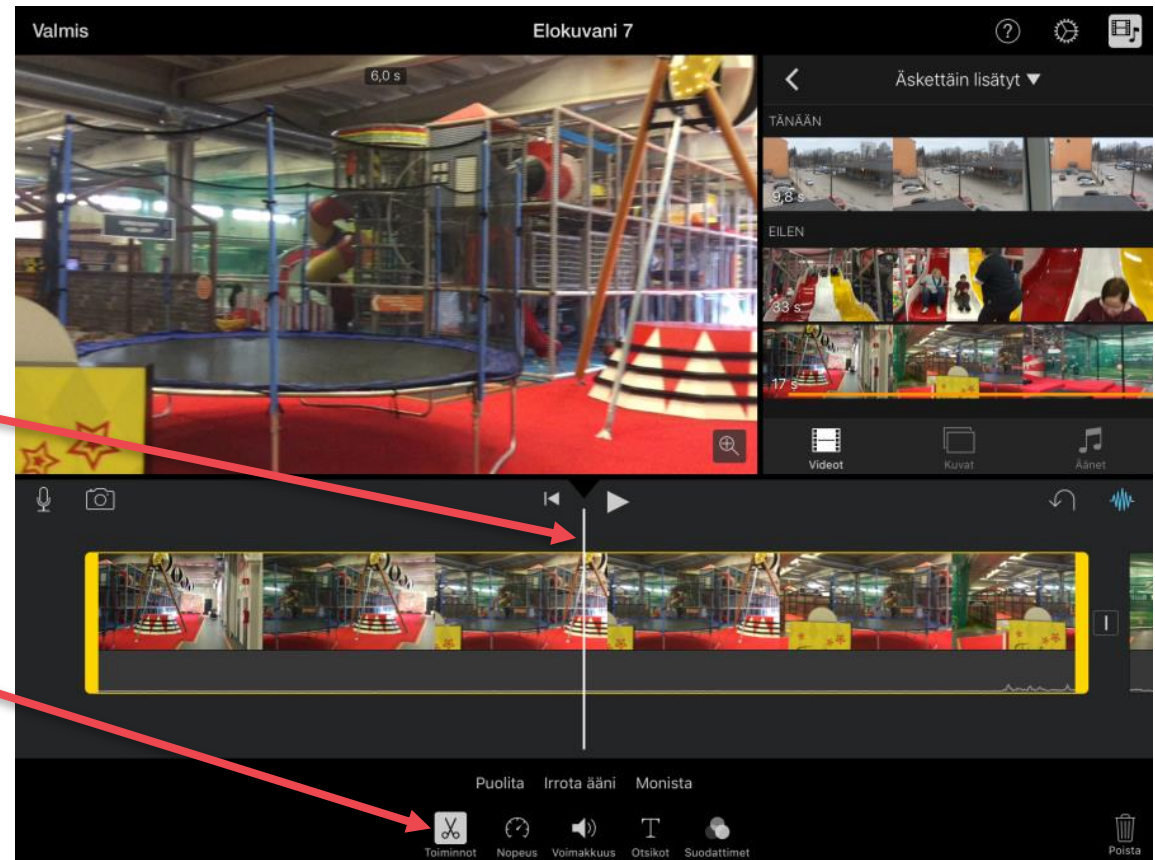

you will see a yellow boarder

around it.

Cut from the beginning or the end:

1. Activate the video.

2. Tap on the yellow line
   at the beginning or end of the video
   and keep you finger down.

3. Move your finger into the spot
   where you want
   the video to start or end.

4. Release your finger.

Cut from the middle:

1. Move the video

   onto the cutting spot

   in other words

   on the white video curser.

2. Activate the video.

3. Tap on the **Actions**-button.

4.Tap on the **Split**-button.

You video is now

divided into two clips.

You can delete the part

you don't need.

How to add photos on your movie

You can add pictures:

- the beginning:

- the end

- between the videos.

1. Move the video
   onto the spot
   where you want to
   add a photo.

2. Tap on the **Photo**-button

    and look for the photo
    you want to add to your movie.

3. Tap on the photo

    you want to add.

    Now you can see the photo

    on your timeline.

Hint:

The photo will show up

on your video for 5 seconds.

You can cut or extend the time

from the beginning of the photo.

How to delete videos or photos

1. Tap on the photo or video,
   you want to delete.

2. Keep your finger down,
   and move it upwards
   until you will see
   a little Paper-sign.

3. Lift your finger.

Now the video
or picture is gone.

How to add text on your movie

1. Think and plan

   what do you want to write

   in the video.

2. Move the video

   into the spot.

3. Activate the video

   or the picture.

4. Tap on the **Titles**-button.
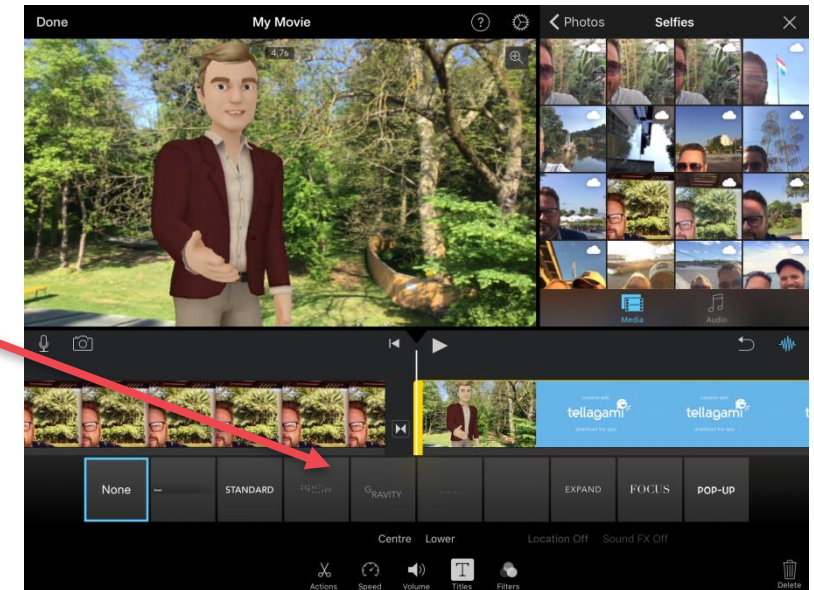

5. Choose the style.

6. Tap on the text
   on the screen.

7. Delete the original text:
   "Title text here".

8. Write your own text.

9. Press the Enter-key
   when you are ready.

   Now you will see the text
   on the video.

How to add animation on your movie

1. Tap on the **Effect**-button.

2. Choose the animation shape,
   you like the best.

3. Tap on the **Animation**-button.

Now the animation will show,

when the picture or video changes.

Hint:

Please, don't have too many

animations on your movie.
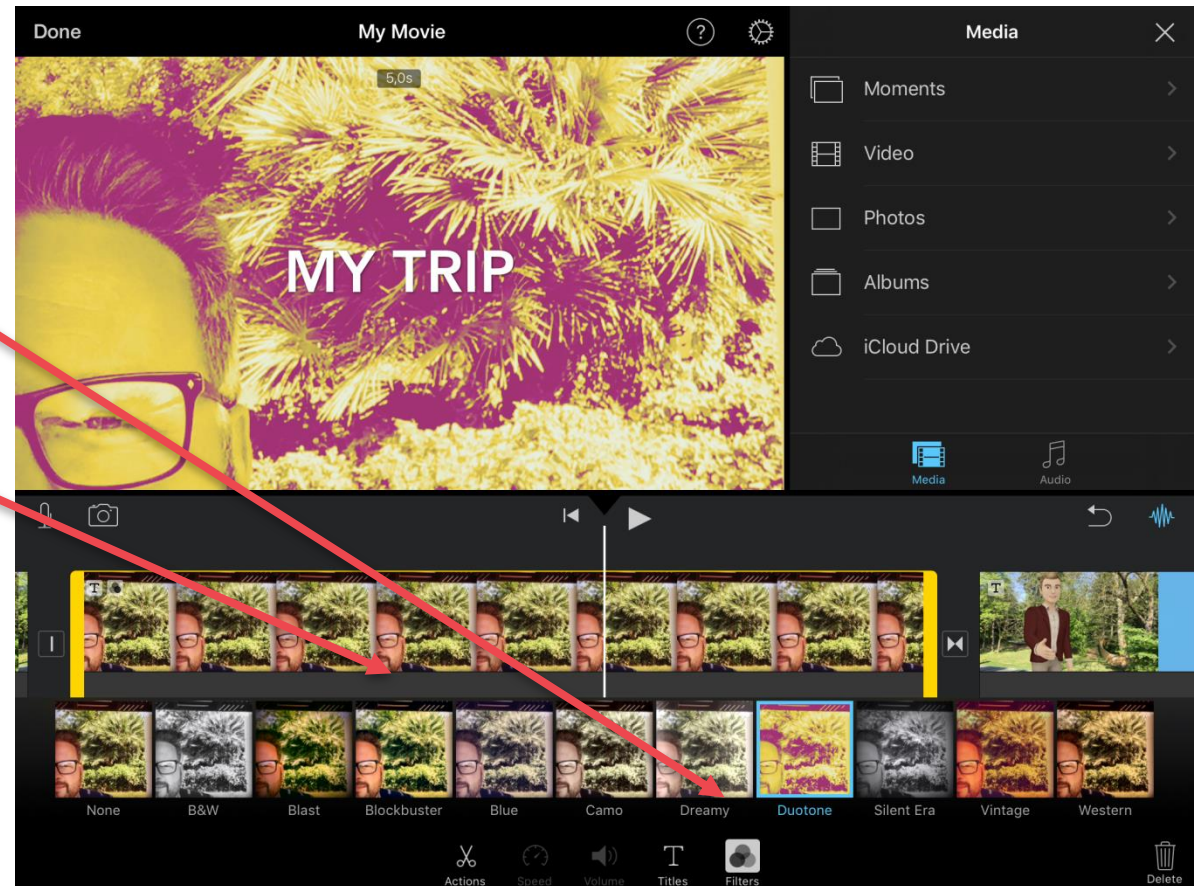

It makes your video incoherent.

How to add an effect on your movie

1. Activate the video or picture
   you want to add an effect to.

2. Tap on the **Filter**-button.

3. Choose the filter,
   you like the best.

Now your picture
or video is filtered.

Hint:

Please, don't have too many
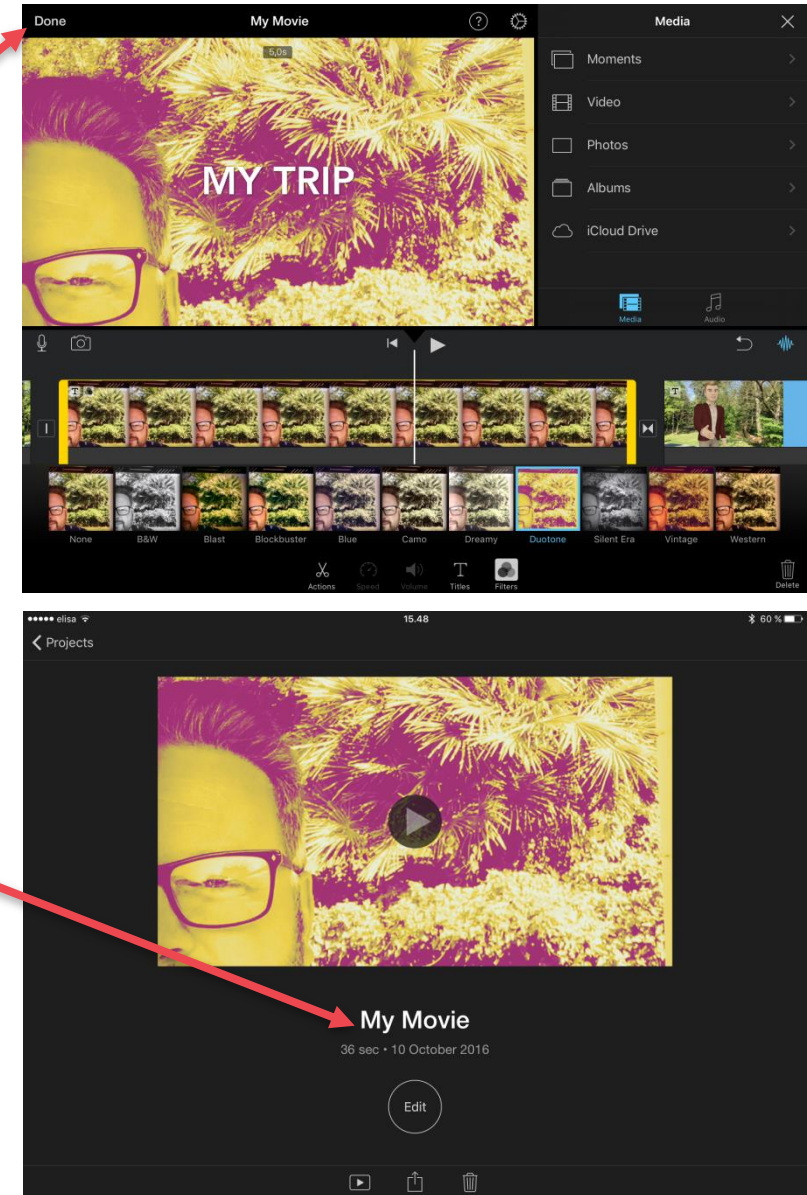

different filters in your movie.

How to save your movie

Always finish your movie first,

before you save it as a new video.

Remember that iMovie saves

your movie project automatically.

1. Tap on the **Done**-button.

2. Give your movie a new name.
   Tap on the My Movie –text.

3.Write a new name for the movie.

4.Press the Enter-key

   when your are ready.

5.Tap on the **Share**-button.

6.Tap on the **Save video** -button.

7. Tap on the **Quality**-button you want.

   HD 720p is a good choice.

8. Wait until the movie has been saved.

   Sometimes this process

   takes several minutes!

   iMovie will show you

   this information,

   when your movie has been saved:

Idea:

You can also share your videos

on social media,

if you wish.

Remember 1: Save your work

Never delete any video clips from your iPad

before you have saved your movie.

If you do that,

your movie will be empty.

Remember2: Copyrights

Use only videos that you have a copyright to.

Never use videos that will cause harm to others.
